

Product Safety Recall

Kelly Bunk Bed

Sold: 21 October 2011 to
23 November 2011

Defect: The Australian Standard for bunk beds requires that protrusions not exceed 8mm. In a batch of 'Kelly' bunk beds sold between the dates mentioned above the protector cap fitted to the upright corner post causes the post to protrude above the rail of the top bunk by between 8.11mm and 8.95mm.

Hazard: The protrusion may snag clothing of the occupant of the top bunk which may cause personal injury.

Action: Fantastic Furniture will supply a replacement protector cap that reduces the height of the protrusion to 8.0mm. The top bunk should not be used without adult supervision until the replacement caps are fitted.

Please call the store where you purchased the 'Kelly' bunk bed or e-mail customerservice@fantasticfurniture.com.au to arrange for replacement caps to be sent to you.
