TEMPERED GLASS **should be handled with care.** Scratches, chips, sudden changes in temperature and hairline fractures may cause the glass to break. This glass is designed to break into small, relatively harmless pieces and not sharp fragments.

Good to know

- Never place extremely hot or cold objects directly onto the glass surface. This may weaken the integrity of the glass and cause it to break suddenly and without warning.

- Dropping heavy, glass, ceramic, metal or similar objects on the table may cause unseen damage to the table leading it to break suddenly and without warning.

Assembly checklist

Read through the instructions carefully before you begin

Make sure you have all the required tools. Never use power tools unless instructed.

Identify and lay out all of the components before you begin assembly

Unless instructed, do not fully tighten screws until the item is fully assembled

Useful Information

- ! Never use power tools unless specifically instructed. They can damage your components or hardware if used incorrectly.
- ! The most common mistakes made during assembly are using the wrong hardware or getting components back to front.
- ! Always use a soft surface (such as carpet or cardboard) when assembling your product to avoid scratching or damaging the surface of the product.
- ! Bulky items such as wardrobes and bunk beds should be assembled in the room they will be used in as they may not fit through a door once assembled.
- ! Never use any glue until you are certain that the parts belong together.
- ! Periodically check and re-tighten all fasteners. Check the product care label or website for product care instructions.
- ! If you are having any difficulties assembling your product, missing any hardware or components please visit our website Help Centre for further assistance.
