Helpful bunk bed safety tips

Bunk beds should be checked periodically to ensure that the guardrail, ladder and other components are secure and in the correct position and all connectors are tight.

We recommend that children under the age of nine (9) do not use the upper bunk. Children should be discouraged from playing on the bunk bed.

No more than one occupant should use the upper bunk at any time (unless otherwise stated).

Bunk beds should be placed a minimum of 2 metres away from any ceiling fans to prevent any injury to the upper bunk occupant.
