Glass should always be handled with care.

Scratches, chips, sudden changes in temperature and hairline fractures may cause glass to break. This glass is designed to break into small, relatively harmless pieces and not sharp fragments.

Avoid placing hot or cold items directly onto the table unless using a thick insulation material such as placemats or coasters.

Avoid dropping objects onto the glass. Do not allow hard or pointed objects to come into contact with the glass. Never use the top area as a chopping surface. Do not sit or stand on the glass surface.

Rattan

Rattan is a natural material that will respond to humidity in the environment. Low humidity may cause the rattan to shrink. High humidity may cause the rattan to absorb moisture and expand, causing the weaving to look loose and wavy.

This is a natural phenomenon and not a defect.
