

Product Care & Maintenance

Glass

We want you to enjoy your Fantastic Furniture for as long as possible, with simple care and maintenance you will extend the life of your furniture.

Glass is breakable, always handle with care. Scratches, chips, sudden changes in temperature, hairline fractures or other minor impurities may cause the glass to break suddenly and without warning.

For general maintenance dust regularly to prevent dirt build up. Use a damp cloth for general cleaning or to remove finger prints and smudges use glass cleaning products according to the manufacturer's instructions. Never use caustic or abrasive cleaning agents and do not use silicone based cleaning products.

Be careful to avoid dragging sharp and hard objects over any glass surface. Do not place very hot or very cold items directly on the glass; instead use table clothes, coasters or heat resistant mats.

Check all your furniture hardware (screws, nuts and bolts) to make sure they are not loose and tighten regularly to help keep the product looking its best for years to come. These care instructions are a general guide – for any specific instructions check your product care label.

Product Care & Maintenance

Timber and Timber Veneers

We want you to enjoy your Fantastic Furniture for as long as possible, with simple care and maintenance you will extend the life of your furniture.

For general maintenance use a clean, damp, non abrasive cloth with warm mild soapy water to remove stubborn stains. Always clean stains and spills immediately otherwise you risk damaging the finish. Avoid using scouring pads and abrasive cleaners as they will cause scratches.

Do not soak or allow spills to soak in. Wipe off any excess moisture with a dry cloth. Do not use silicone based products, and when using furniture polish, use sparingly and do not rub the surface to avoid damaging the original finish.

Use heat protecting mats for hot items. Tablecloths, placements and coaster are recommended to protect against moisture and general wear and tear.

Extreme temperatures can cause solid timber to expand and contract resulting in movement and may lead to splits and cracks.

Keep timber furniture away from direct sunlight and heat sources, as this may cause the finish to fade or change appearance.

Check all your furniture hardware (screws, nuts and bolts) to make sure they are not loose and tighten regularly to help keep the product looking its best for years to come.

These care instructions are a general guide – for any specific instructions check your product care label.
