### Care and Maintenance

This fire pit is a quality-built product and is made to last for many years. The frame structure of this unit is made of powder-coated steel extrusion and should resist rusting under normal use. Should rusting occur, we suggest using a steel brush on the affected area followed by a spray coating of high temperature anti-rust paint. For additional rust proofing of the bowl, grate and mesh lid we recommend that a coat of high temperature primer (such as rustoleum or similar brand) is applied **before** use. You may cover the fire pit with a Protective Cover ( not provided) when the fire pit is not in use. Ensure the fire pit has completely cooled down before using the Protective Cover.
